Professional Summary

Full-stack software developer with hands-on experience in the MERN stack, Java, and Spring Boot. Delivered production-ready applications across two internships and three end-to-end projects, including REST APIs, third-party service integrations, and AI-driven features. Working foundation in OOP, Data Structures, and Algorithms, with 100+ problems solved on LeetCode. Seeking a Full-Stack / Backend Software Developer role to build scalable, high-performance applications.

Technical Skills

Languages: JavaScript, Java, C, C++, Python
Frontend/Backend: React.js, Node.js, Express.js, REST APIs, Spring Boot, API Development, Authentication
Databases: MySQL, MongoDB
Concepts: Data Structures & Algorithms, OOP, Database Integration
Tools & Cloud: Git, GitHub, VS Code, Postman, MySQL Workbench, AWS, Docker, Kubernetes, Jenkins, Test Automation

Work Experience

Software Developer Intern — Skill Software Inc, USA

- Migrated legacy Selenium test automation suites to Playwright (Python), reducing test execution time by an estimated 30–40% and improving reliability across internal project pipelines.
- Configured and managed AWS cloud infrastructure for internal applications, streamlining deployment workflows and reducing manual deployment steps.

Full Stack Developer Intern — Asta Systech Pvt. Ltd, India

- Built a full-stack CRUD application end-to-end using Java, Spring Boot, React.js, and SQL, supporting core business operations.
- Designed and integrated RESTful APIs with a relational database, ensuring consistent data flow across the application lifecycle.

Projects

Food Ordering Progressive Web Application *React.js, Node.js, Express.js, MySQL, ML*

- Built a production-ready full-stack food ordering PWA using React.js, Node.js, and Express.js, with MySQL for data persistence and ML-based algorithms powering personalized food recommendations.
- Integrated Firebase push notifications, JWT authentication, GPay payment integration, and a real-time admin panel.
- Engineered for offline-first performance using PWA service workers, improving load reliability on low-connectivity networks.

Mydeen AI — Full-Stack AI Assistant *React.js, FastAPI, Supabase, Groq LLM API*

- Built a full-stack conversational AI assistant using React.js for the frontend, Python FastAPI for the backend, Supabase for authentication and database, and Groq LLM APIs for real-time chat with persistent chat history.
- Integrated web search, PDF analysis, and OCR-based text extraction into a scalable backend architecture, expanding assistant capability beyond text-only queries.

Seasonal Deceptive Website Detection System *Python, Streamlit*

- Built an event-driven cybersecurity system using Python to flag fraudulent event-based websites through URL analysis, SSL validation, domain-age checks, and redirection detection.
- Deployed an explainable risk-scoring model via a Streamlit interface, improving transparency and interpretability of fraud-detection results.

Education

BTech — Computer Science and Business Systems	2023 – 2027
Francis Xavier Engineering College	CGPA: 7.81
High School	2021 – 2023
Time Matric Higher Secondary School	Percentage: 83.2%

Certifications

- Internet of Things — IIT Kharagpur (NPTEL), 80%
- Java Essentials & Git Essential Training — LinkedIn Learning
- Web Development and C Programming — Udemy

Soft Skills

Problem Solving — Willingness to Learn — Team Collaboration — Time Management

Languages Known

Tamil, English
